

Antonio Rodriguez

Web Development and Digital Marketing Expert

Living in Miami, Florida and willing to relocate

Profile

Plug-and-play full stack web developer with over 12 years of experience building websites, applications, API, chatbots, and prototypes.

Spent the last 6 years leading and mentoring web and mobile engineering teams, remotely and physically, at digital marketing agencies, working for high-profile clients with demanding features, deadlines, and budgets.

Currently seeking for a technical position to move away from the management path. Extremely enthusiastic about learning and optimizing workflows, user experience, deployment processes, communication, collaboration, app performance, and staff satisfaction.

Professional Experience

M8 Director of Technology

August 2016 - Present • Miami, FL

- Lead technical point-of-contact for all clients.
- Hire, manage and mentor engineering teams onsite and remotely.
- Develop and present prototypes to introduce new capabilities, such as AI, NLP, chatbots, Alexa skills, beacons, and video intelligence.
- Improve web development quality and efficiency by introducing agile processes, best practices, modern workflows, and tools.
- Regularly involved in day-to-day web development tasks for internal and client projects.

Nobox Director of Technology & Partner

March 2011 - July 2016 • Miami, FL

- Served as the technical point-of-contact for all clients.
- Hired, managed and mentored an on-site web development team.
- Developed internal products for media trafficking, social listening, automatic asset preparation, and collaboration.
- Occasionally involved in day-to-day web development tasks for internal and client projects.
- Responsible for budgeting and estimation of technical projects.
- Developed web applications used by millions of users for clients such as Sony PlayStation, Mozilla Firefox, Marriott and Copa Airlines.
